Materials

Type of wood: larch
 Round wooden poles 12 and 14 cm thickness cut outside the heart
 Metal corner supports are treated against rust and polyester coated
 Brace seats on galvanized chains
 Maintenance-free swing hooks
 Galvanized metal base supports

Product Description

Wooden hexagonal swing for children from 6 to 15 years. The swing is made up of 6 larch stands with a diameter of 12 cm and six horizontal larch beams with a diameter of 14 cm. The vertical poles are connected with each other by the horizontal beams to form a hexagon. In the six corners, the swing is reinforced with red polyester-coated steel support brackets with a diameter of 42 mm. The special rubber seats with brace are attached to maintenance-free swing hooks using galvanized chains. The brace seats prevent children from jumping against each other while leaving the swing. At the bottom, the swing has metal galvanized shell-shaped pole supports that are fixed into the ground.
 Houten zeshoekschommel voor kinderen van 6 tot 15 jaar.
