 Steel cable with tensioning mechanism 10 mm thick
 Platform boards 22 and 35 mm thick
 Round rubber seat on covered galvanized chain
 Runner in stainless steel
 Rubber mount with spring brake
 Galvanized metal base supports
 Plastic protection caps

Product Description

Playground equipment for children aged 6 to 15 years. This wooden aerial runway is a fun way to bridge a long distance. The aerial runway has 2 start platforms. The children can climb on the start platform and mount on the round rubber seat. This one is attached to the runner by a covered galvanized chain. The children walk from the start platform and slide to the other platform while seated on the rubber seat. The round wooden larch poles have a diameter of 10 and 12 cm and are fixed into the ground by using metal base supports. All metal parts are treated against rust and all nuts and bolts are completely covered with plastic protection caps.
